Naomi Farrugia

task 2

Brief

Throughout this course, I'll be building a website to showcase my portfolio, designed to attract potential clients or companies seeking a junior graphic designer.

Since it's a graphic design portfolio, my goal is to focus on simplicity by using minimal colours and easy-to-read fonts.

The primary reviewers will be close friends who will analyze the portfolio and provide feedback, which will be welcomed and considered. Additionally, other reviewers will be friends studying this course, offering feedback primarily focused on the graphic design elements.

The website will feature a home, about, contact, and portfolio page. Three additional pages will be added under the portfolio section, including graphic designs and digital drawings.

— Project idea —

The website will feature a total of 7 pages.

Home Page: Upon entering, visitors will see a large image covering the page with an inspirational quote. The logo will be placed at the top left, and a sliding menu will be positioned at the top right. Each page will include images to enhance the visual experience.

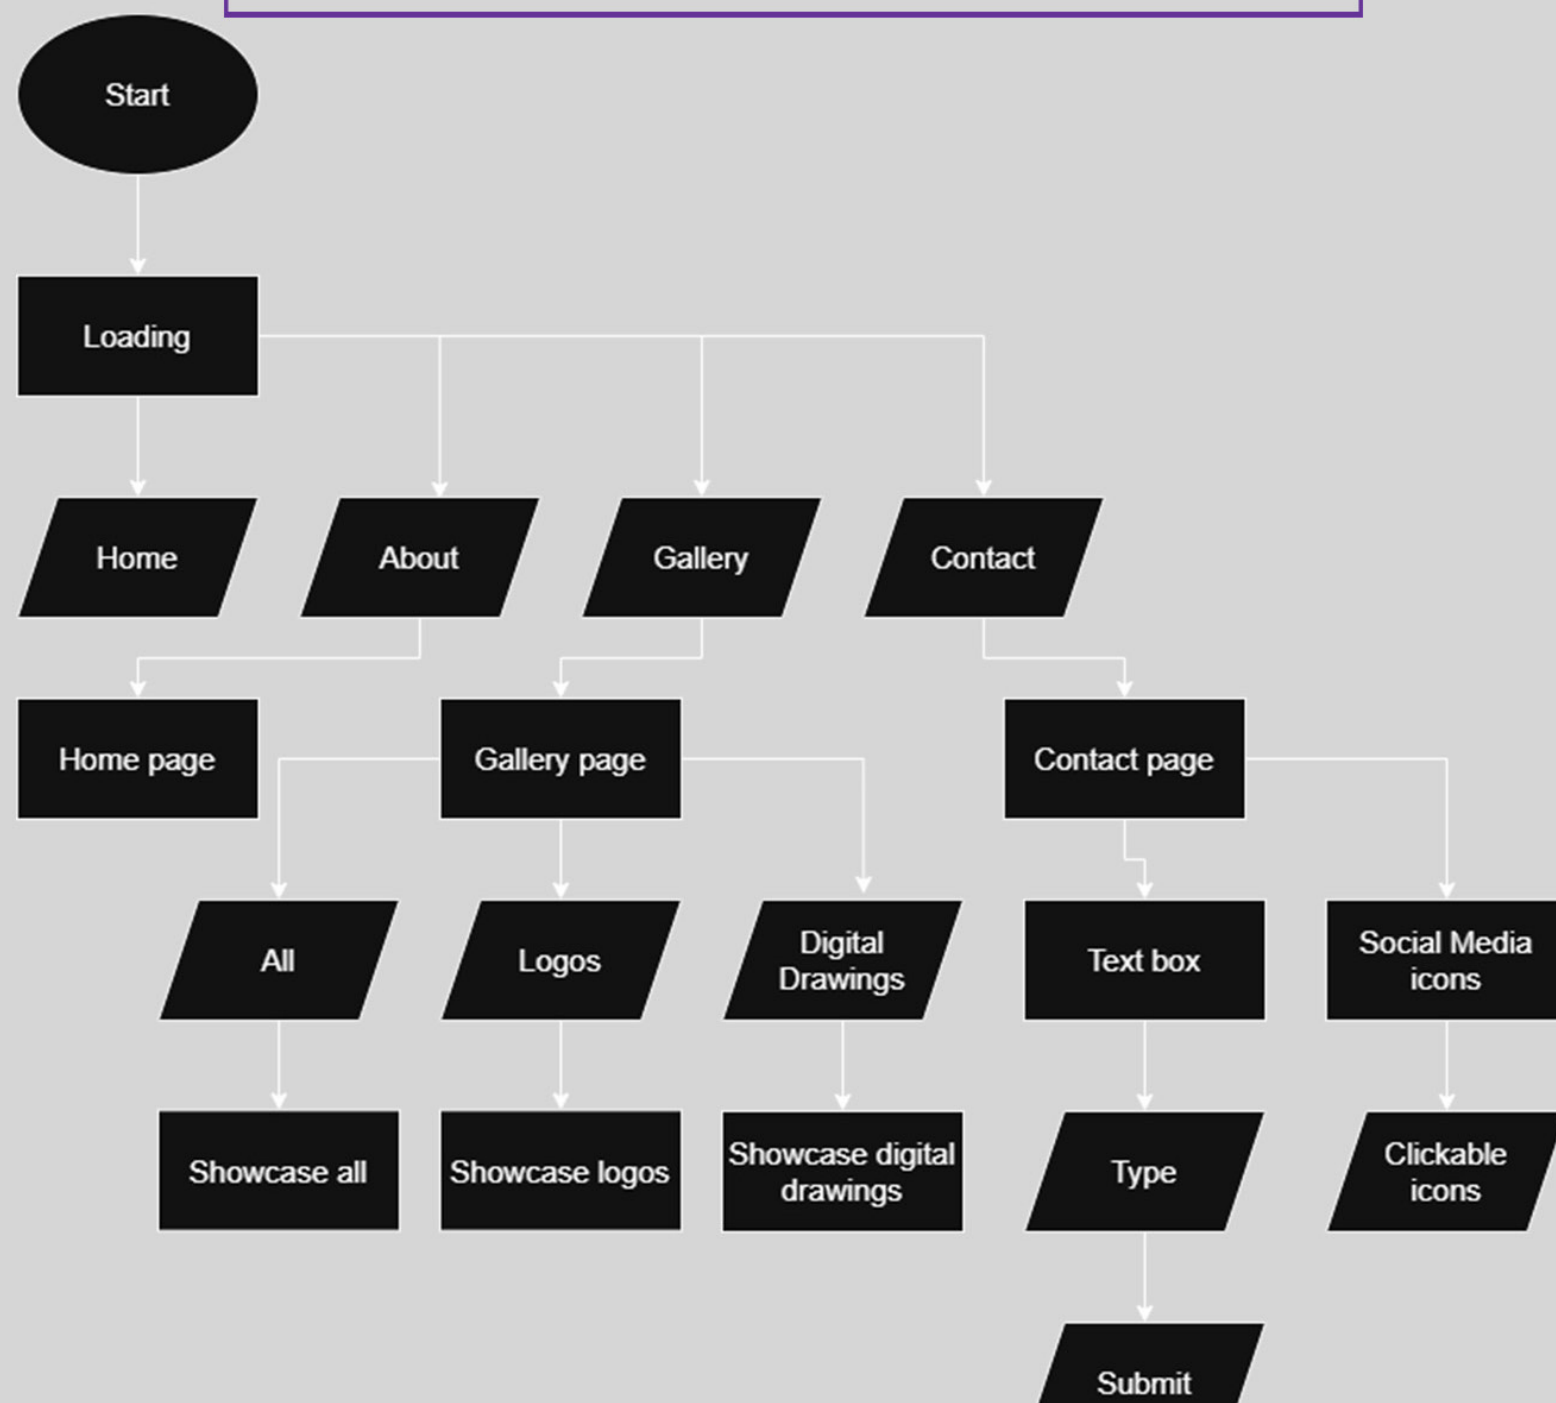

First Page: This page will feature an illustration along with a quote or text. Scrolling down, visitors will be able to explore my best work, which will be clickable for further details.

About Page: This section will include a photo of myself with a brief introduction, giving visitors a chance to get to know me better. A clickable button will provide access to additional information.

Contact Page: A dedicated contact page will be available.

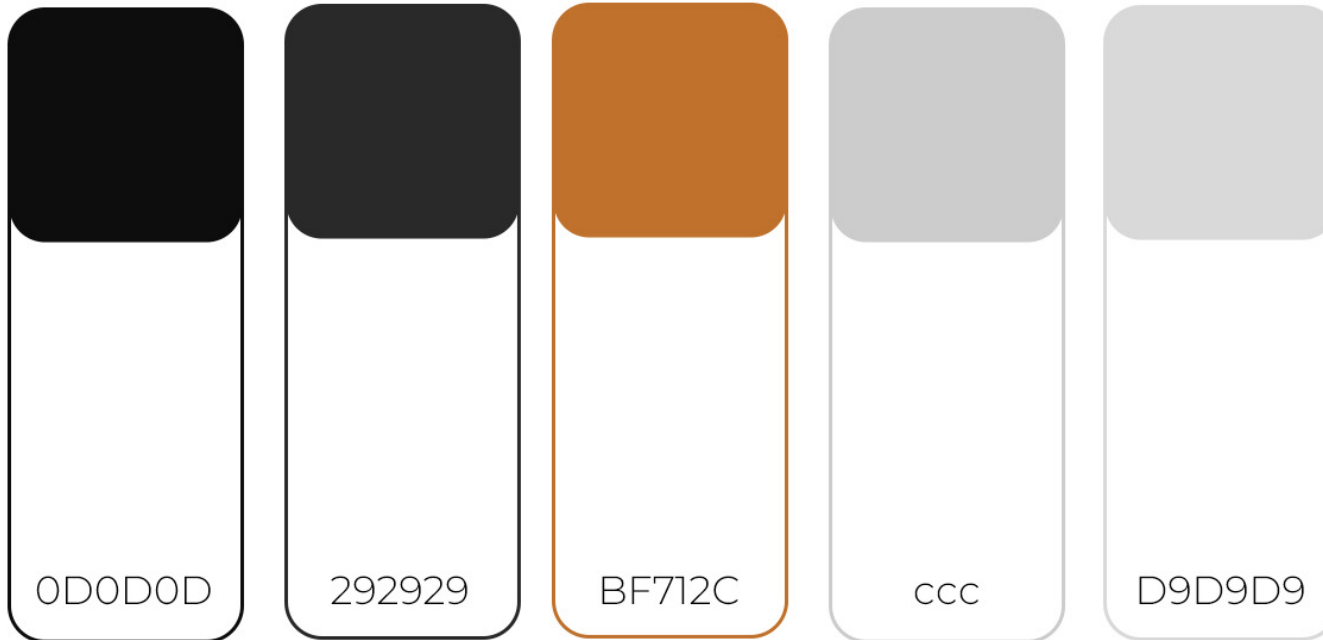

Footer: The footer will contain links to social media and other pages on the website.
